Because It Pays

The one great reason for having a Farmer's
Company is that it pays farmers to have it.

And the one great reason for using the Farmer's
Company elevator is that it pays to use it.

Long experience has proved to farmers that it
does pay to have a farmers' Company and that it
does pay to make use of it.

UNITED GRAIN GROWERS LTD

Elevator at Raymond

At the School Of Agriculture

The School of Agriculture now
has a total enrolment of 61, with
11 boys and 13 girls attending
second year and 24 boys and 13
girls in first year.

The Deputy Minister of Agri-
culture, Mr. H. A. Craig, visited
the school last week and was fa-
vorably impressed with the splen-
did classes.

A. E. Barranger B. S. A., the
new instructor of mechanics, has
recently arrived from Manitoba,
and his arrival completes the
school staff.

The staff and students of the
school are giving the opening
dance tonight. Admission is by
invitation only, except in the case
of graduates of the school, who are
automatically invited to all school
functions of this nature.

The students of the school re-
cently held their first annual field
day with remarkable success.
Austin Russell, second year student,
tied with William Bennett, first
year student, for the individual
championship. Lucile Atwood,
second year student, won the girl's
championship, while Ethel Conlon
won premier honors among the
first year girls. The class champ-
ionship went to the second year.

On Friday last the students
held their annual executive elec-
tion and the following is the ex-
ecutive for the school year:

Students' Council
Staff representatives, O. S.
Longman, Chas. Asplund and A.
E. Barranger. President, Agnes
Salmon. Vice president, Harold
Evanson.

Literary
Staff representative, D. L. Gil-
bert and Miss J. Redig. President,
Clinton Hardy. Vice president,
Elsie Anderson. Secretary, Lu-
ella Atwood.

Athletic
Staff representatives, W. A.
Smith, C. McBeth and Miss A.
Scott. President, Edward Peter-
son. Vice president, Fern Wilde.
Secretary, Harry Willis.

C. Smith, assistant superintend-
ent at the local sugar factory, left
last Friday for Rigby, Idaho,
where he will make his future
home.

BORN—To Mr. and Mrs. Glen
Tollestrup last Sunday, a daugh-
ter.

Gym Room To Be Opened

Preparations are being made by
Messrs. Solon Low and Kenneth
Allred, of the high school staff,
to open a gymnasium at the high
school, where young men may go
and work out at boxing and
wrestling. Much credit is due
these men for taking the initiative
in starting this much needed ad-
dition to our winter recreation. In
past years Raymond has not kept
abreast of her neighbor towns and
very few contestants from here
have ever entered the provincial
contests in either boxing or wrest-
ling. Both Mr. Low and Mr.
Allred are qualified and willing to
instruct any of the local boys in
these games, and they are confi-
dent that they can discover and
train plenty of promising material
for the coming provincial meets.
A new mat and boxing equipment
has been purchased.

James Christensen left last Tues-
day for Salt Lake City, where he
will work at the garage business.

The last car of beets reached the
local sugar mill last Tuesday and
a survey of the sheds at that time
indicates that the sugar campaign
will probably end the middle of
next week.

Officials of the sugar factory at
Chinook, Montana, which mill
closed on November 8, were visit-
ing at the local plant last week.
An exchange of ideas and meth-
ods was made with the local crew
and staff. Among the visitors
were R. L. Howard, manager and
superintendent, Wallace Peterson,
assistant superintendent, E. El-
linger, chemist, John Butler, mas-
ter mechanic, Chas. Crabb and
John Patterson, foremen and D.
Scott, agricultural superintendent.
They report a successful run
at Chinook this year.

A missionary farewell party was
held last Tuesday evening in hon-
or of Karl Dahl, Wm. Evans, and
Robert Salmon. Robert left
Thursday for his field of labor in
the Central States. Karl and Wil-
liam will leave tomorrow, their
destination being the north Central
States mission. A large crowd was
present at the party and the
young missionaries can feel that
they are taking with them the
best wishes of the community in
their new calling. The collection
taken by the missionary com-
mittee was given to assist the
boys, each one receiving about \$10.

In clean, bright Aluminum.

Think It Over.

Hon. R. B. Bennett, in addressing the Maritime Province Club in Montreal, told a "Father Doyle" story, which he heard while visiting Nova Scotia this past summer, a story with a point to it:

"Father Doyle was walking along a road there, before automobiles were allowed on Prince Edward Island—that is not so long ago—and he was overtaken by a farmer in a democrat. The farmer said, 'Will you have a lift?' and Father Doyle said he would be delighted. He got into the democrat and opened up the conversation by asking the farmer his name. 'My name's Murphy, but I'm not a Catholic,' the farmer answered. Father Doyle suggested that they might leave religious matters alone and get along quite well together. As they neared the journey's end, Father Doyle thanked the farmer, and offered to give him a little advice from an old man of long experience. 'When you die, you hope to go to heaven?' 'I hope so.' 'Well, remember my advice. When you get there, and go up to the golden gate and knock at the door, and St. Peter says 'Who's there?' Just say 'Murphy,' and stop right there.'"

Father Doyle's suggestion that we might leave our religious differences alone and treat each other as fellow men—(say "Murphy" and stop right there)—is good advice. What, says one daily paper in commenting on this little story, is wanted is a mind and a will, and organizations, to emphasize our common needs, and our common ideals, the points upon which we can agree, rather the minor matters upon which we disagree and which will engender ill-will, strife and discord.

The recent Presidential election in the United States is an object lesson to all people. A great country of upwards of 110,000,000 people, engaged in the supremely important task of determining the personnel and policies of their Government for the next four years, have had their minds distracted from the real issue involved in the election by appeals based solely on the religious belief of one of the candidates for President. It is not that the candidate in question was a heathen, or an atheist, denying there is a God, and wholly devoted to worldly things and lacking all the finer ideals in life;—no, he believes in, and worships the same God as those who attacked him, but he was born into and brought up to respect certain doctrines and forms in one particular branch of the Christian church, just as his opponents were born into and brought up to respect and accept the doctrines and forms of worship in other branches of the Christian church. But these Christians could not agree to disagree on these minor matters and unite on the great fundamentals of Christianity itself. With what result?

Great national issues affecting the whole life and future of the country, such as the prohibitory liquor laws, the tariff, the improvement of agriculture, public ownership of public utilities versus private and monopolistic control, and other real national questions, all became confused and mixed up in the minds of millions of people with the really inconsequential subject of one man's church affiliation. And what has been gained thereby? What remains after all the shouting is over? Old friendships of a lifetime broken, feelings of bitterness and hatred engendered, communities divided which were formerly united in work for the common good.

It is but a repetition of the strife of the middle ages. Much the same thing has occurred in Canada over and over again, but no man living can point to any good resulting from such campaigns. Here in Western Canada our people pride themselves on their devotion to co-operative principles, and they can point to the accomplishment of great and lasting reforms because of their acceptance of, and devotion to co-operative policies and enterprises. But they may well ask themselves how long that good-will and harmony so essential to the success of co-operative endeavor will last, not to mention its further development and growth in order that still greater things may be achieved, if they are going to give encouragement to feelings of bitterness and take part in campaigns of division based on the manner in which their individual members worship God.

In all matters of religious differences of opinion, Father Doyle's advice is good: Just say "Murphy" and stop right there.

Manitoba Hydro Plan

Provincial Government Has Program That Will Extend All Over Province

It has been announced that the Manitoba Government is prepared to embark on a programme of Hydro-Electric power transmission line construction that will extend to all parts of the Province—to towns, hamlets, and farms—the Government to pay one half of the cost, including lines already built. Under this new policy there is a guarantee of sufficient power, very low rates, and revenue in the way of rentals for power sites. Thus, it has been stated on behalf of the Government, it is possible for the Government to undertake the bonusing of town and farm lines without incurring a dollar of capital debt; without the necessity of increased taxation, and without the risk of large annual deficits. This policy is

designed to promote industries throughout the Province and to lighten the labor and increase the comforts of the farm.

Proof Enough

Scene: A Glasgow railway station. Old Lady (for the twentieth time): Is this really the train for Ayr?

Porter: Well, mum, the board of directors, the stationmaster, the signalman, the guard, the driver, and myself think so, so I suppose it must be!

"Mrs. Green says she can't understand why her husband isn't well and out of the hospital long ago."

"She hasn't seen the nurse who attends him."

Prisoner 859466: "Stone walls do not make a prison."

Prisoner 4487623: "Well, this here concrete seem to do purty well!"

Too Much ACID

Many people, two hours after eating, suffer indigestion as they call it. It is usually excess acid. Correct it with an alkali. The best way, the quick, harmless and efficient way, is Phillips' Milk of Magnesia. It has remained for 50 years the standard with physicians. One spoonful in water neutralizes many times its volume in stomach acids, and at once. The symptoms disappear in five minutes.

You will never use crude methods when you know this better method. And you will never suffer from excess acid when you prove out this easy relief. Please do that—for your own sake—now.

Be sure to get the genuine Phillips' Milk of Magnesia prescribed by physicians for 50 years in correcting excess acids. Each bottle contains full directions—any drugstore.

H. B. Road Nearing Completion

Laying Of Rails Will Be Completed By Next March

The laying of rails on the Hudson Bay Railway will be completed by next March, Major Graham A. Bell, deputy minister of railways and canals, has announced, but considerable blasting will have to be done before the road can be opened for traffic. The work at Fort Churchill, where modern harbor accommodations and harbor equipment are being installed, is being pushed ahead. It will require another three years to complete this undertaking. Discussing the development of Northern Manitoba, Major Bell states that there were many evidences of mineralization along the route of the railway, particularly as far north as mileage 200 north of The Pas. He felt that those deposits would play a great part in the opening up of that section of the province. Five thousand men are now employed on the railway and harbor works.

TONIC TREATMENT FOR INDIGESTION

Indigestion Comes With a Run-Down Condition—Relief Comes Through Enriching the Blood—Dr. Williams' Pink Pills Make New Blood.

There are many symptoms of indigestion such as acute pain after eating, belching of wind, nausea and vomiting, bloating and pains in the region of the heart, a dread of food for the misery it causes. Dieting and the use of pre-digested foods may give ease, but that is all, and meanwhile the stomach grows steadily weaker. The work of digestion depends upon the blood and nerves and the only way to get rid of indigestion is to tone up the stomach through the blood. To do the work nature intended it should do. The one thorough way to do this is through the use of Dr. Williams' Pink Pills, which renew the blood, strengthen the nerves and enable the stomach to do its work with ease and comfort. Neglected indigestion means prolonged misery. If you have any of the symptoms of this trouble try the tonic treatment with Dr. Williams' Pink Pills at once and you will be gratified with the results.

Among the many who have found new health through the use of Dr. Williams' Pink Pills is Mrs. Ada Webb, R.R. No. 3, Prescott, Ont., who says:—"For a long time I went through the tortures of nervous indigestion; I call it torture because no other word can describe what I endured. If my stomach was empty I retched. If I took food I vomited. I did not sleep, and I was steadily growing weaker. I doctored for months but with no benefit. One day my husband said, as the treatment you have had has not helped you, why not try Dr. Williams' Pink Pills. I consented and he got me a supply. After I had been taking the pills for a while I knew they were helping me as the pains and retching grew less and I slept better. I gladly continued the use of the pills and in a few months I felt like a new woman, better than I had felt for years, and able to work for my husband and children again. After such a wonderful experience how can I do anything else but recommend Dr. Williams' Pink Pills."

If you need a blood-building tonic begin taking Dr. Williams' Pink Pills today. Sold by all medicine dealers or sent by mail at 50 cents a box by writing The Dr. Williams' Medicine Co., Brockville, Ont.

Courtesy Well Rewarded

A happy result of a servant girl's act of courtesy at Leeds has just come to light. Two or three years ago the girl, named Elsie Fellowes, assisted an old lady across a busy street, and at the time the lady took a note of the girl's name and address. Recently Miss Fellowes received a letter advising her of the old lady's death and a bequest of \$2,000.

Asthma Brings Misery, but Dr. J. D. Kellogg's Asthma Remedy will replace the misery with welcome relief. Inhaled as smoke or vapor it reaches the very innermost recesses of the bronchial passages and soothes them. Restriction passes and easy breathing returns. If you knew as well how this remedy would help you as do thousands of grateful users, there would be a package in your home tonight. Try it.

A German botanist is reported to have succeeded in producing 40,000 varieties of dandelions. The majority of folk will feel that one variety is nuisance enough.

To safeguard the child from damage that worms cause, use Miller's Worm Powders, the medicine par excellence for children. These powders will clear the system entirely of worms, will regulate and stimulate the organs injuriously affected by the worms, and will encourage healthful operation of the digestive processes. As a vermifuge it can be relied on for its effectiveness.

Hostess to curate at the children's party? "Will you give them your song now, Mr. Meekie, or shall we allow them to enjoy themselves for another half-hour?"

Minard's Liniment Invaluable Everywhere.

N. W. U. 1759

Northern Outposts Are Cheered By Radio

Broadcasting Programs For Benefit Of Lonely Dwellers In Northland

Broadcasting programs to the Far North will be continued this winter, and messages will be sent to those police posts, missions and trading stations which are scattered throughout Canada's territory north of the 60th parallel. The programs commence Saturday night, November 17, at 11 o'clock Eastern standard time, the Canadian Westinghouse Company operating the broadcast in conjunction with allied stations in the United States.

Officials of the Northwest Territories branch of the Department of the Interior said that the success which had attended previous efforts encouraged them to continue. Gratifying results had been obtained, inasmuch as the lives of the men on the lonely outposts of Canada's northern empire had been greatly cheered by the contact with the world.

For the most part, the messages sent are of a personal nature, being expressions of regards from relatives of the men distributed throughout the north.

Another phase of the broadcast is one which assists the department at times in that instructions can be sent to the officials in the north, supplementary to those already given by mail.

A network of wireless stations now extends over the Northland.

People Should Rest More

Health Would Store Up Reserves Of Health Says Great Surgeon

Sir Berkeley Moynihan, the great surgeon, said that one way to keep young looking is consistently and regularly to allow the nerves to rest.

A quarter of an hour's quiet relaxation preferably in solitude, immediately after luncheon would store up reserves of health and stamina. When the famous Mayo brothers, the American surgeons, came to spend a holiday with him they never failed after luncheon to go to their rooms for a quarter of an hour's rest in complete isolation.

Another of Sir Berkeley's maxims is that every man when he reaches 60, no matter how well he feels, should take three months' holiday. "Not more than three months for the man with an active mind," he says.

Made Best Guess

Little Albert came home from school with a new book under his arm. It's a prize, mother," he said.

"A prize? What for, dear?"

"For natural history. Teacher asked me how many legs an ostrich had and I said three."

"But an ostrich has two legs."

"I know that now, mother, but the rest of the class said four, so I was nearest."

Nation-wide Fame.—There is scarcely a corner of this great Dominion where the merits of Dr. Thomas' Electric Oil have not been tried and proved. It is one of the world's most efficient remedies for sore throat, lame back and many other ailments arising from inflammation. Rubbed on the skin its healing power is readily absorbed, and it can also be taken internally.

Sawmill For Prince George District

A sawmill to cut crating material for the General Motors of Canada, is in prospect for the Prince George District, Central British Columbia, the Prince George Citizen states. The mill will be located at a point on the Prince Rupert line of the Canadian National Railways. General Motors use approximately 15,000,000 feet of crating annually.

Useful In Camp.—Explorers, surveyors, prospectors and hunters will find Dr. Thomas' Electric Oil very useful in camp. When the feet and legs are wet and cold it is well to rub them freely with the Oil and the result will be the prevention of pains in the muscles, and should a cut or sprain be sustained, nothing could be better as a dressing or lotion.

Southern Alberta Sugar Beets

The Barnwell district in Northern Alberta is coming along fast in beet growing, there being about 2,300 acres planted to the succulent crop this fall, producing an average of 11 tons to the acre, but in some cases going as high as 18.

The Guide—"Yes, it must be over a thousand years old. You can take it from me they don't build such ancient castles nowadays."

Not Always

"I have always felt a prejudice against the word 'lady,'" said a man; "doubtless because of its frequent misuse. I have found that while every lady is a woman, every woman, of course, is not a lady."

Minard's Liniment for Backache.

Perhaps you didn't realize that Aspirin tablets are made to relieve the deep-down rheumatic aches as well as dispel the occasional headache. They do! In cases of neuralgia, neuritis, lumbago; for those pains that penetrate one's very bones, Aspirin tablets offer real relief. Just be sure you are getting the real Aspirin, with Bayer on each tablet and on the box—with proven directions inside. All druggists.

Physicians prescribe Aspirin; it does NOT affect the heart

Aspirin is the trade mark (registered in Canada) indicating Bayer Manufacture. While it is well known that Aspirin means Bayer manufacture, to assure the public against imitations, the Tablets will be stamped with their "Bayer Cross" trademark.

Salads For Health

Vegetables and Fruit Needed In Winter As Well As Summer

Do not allow yourself to get away from the daily salad habit, now that the weather is getting colder, and some of the usual salad ingredients are not at hand.

Health demands plenty of green vegetables and fresh fruit, in winter time as well as in summer. Here is an exceptionally good little salad that may be prepared at this season—at very little cost, too:

Peel oranges and remove all white skin. Cut into one-fourth inch slices and cut each slice into halves. Dice celery and apple and mix with mayonnaise. Arrange a circle of half-slices of oranges on a lettuce-covered salad plate, fill center with apple and celery mixture, and garnish with celery tips.

There is no poisonous ingredient in Holloway's Corn Remover, and it can be used without danger or injury.

Heaviest Wheat Yield

Eight hundred and eighty-eight bushels of wheat from ten acres or 88.8 bushels an acre are reported by Fred Sinn, who farms thirty-five miles east of Calgary. This is the heaviest wheat yield ever recorded in Alberta.

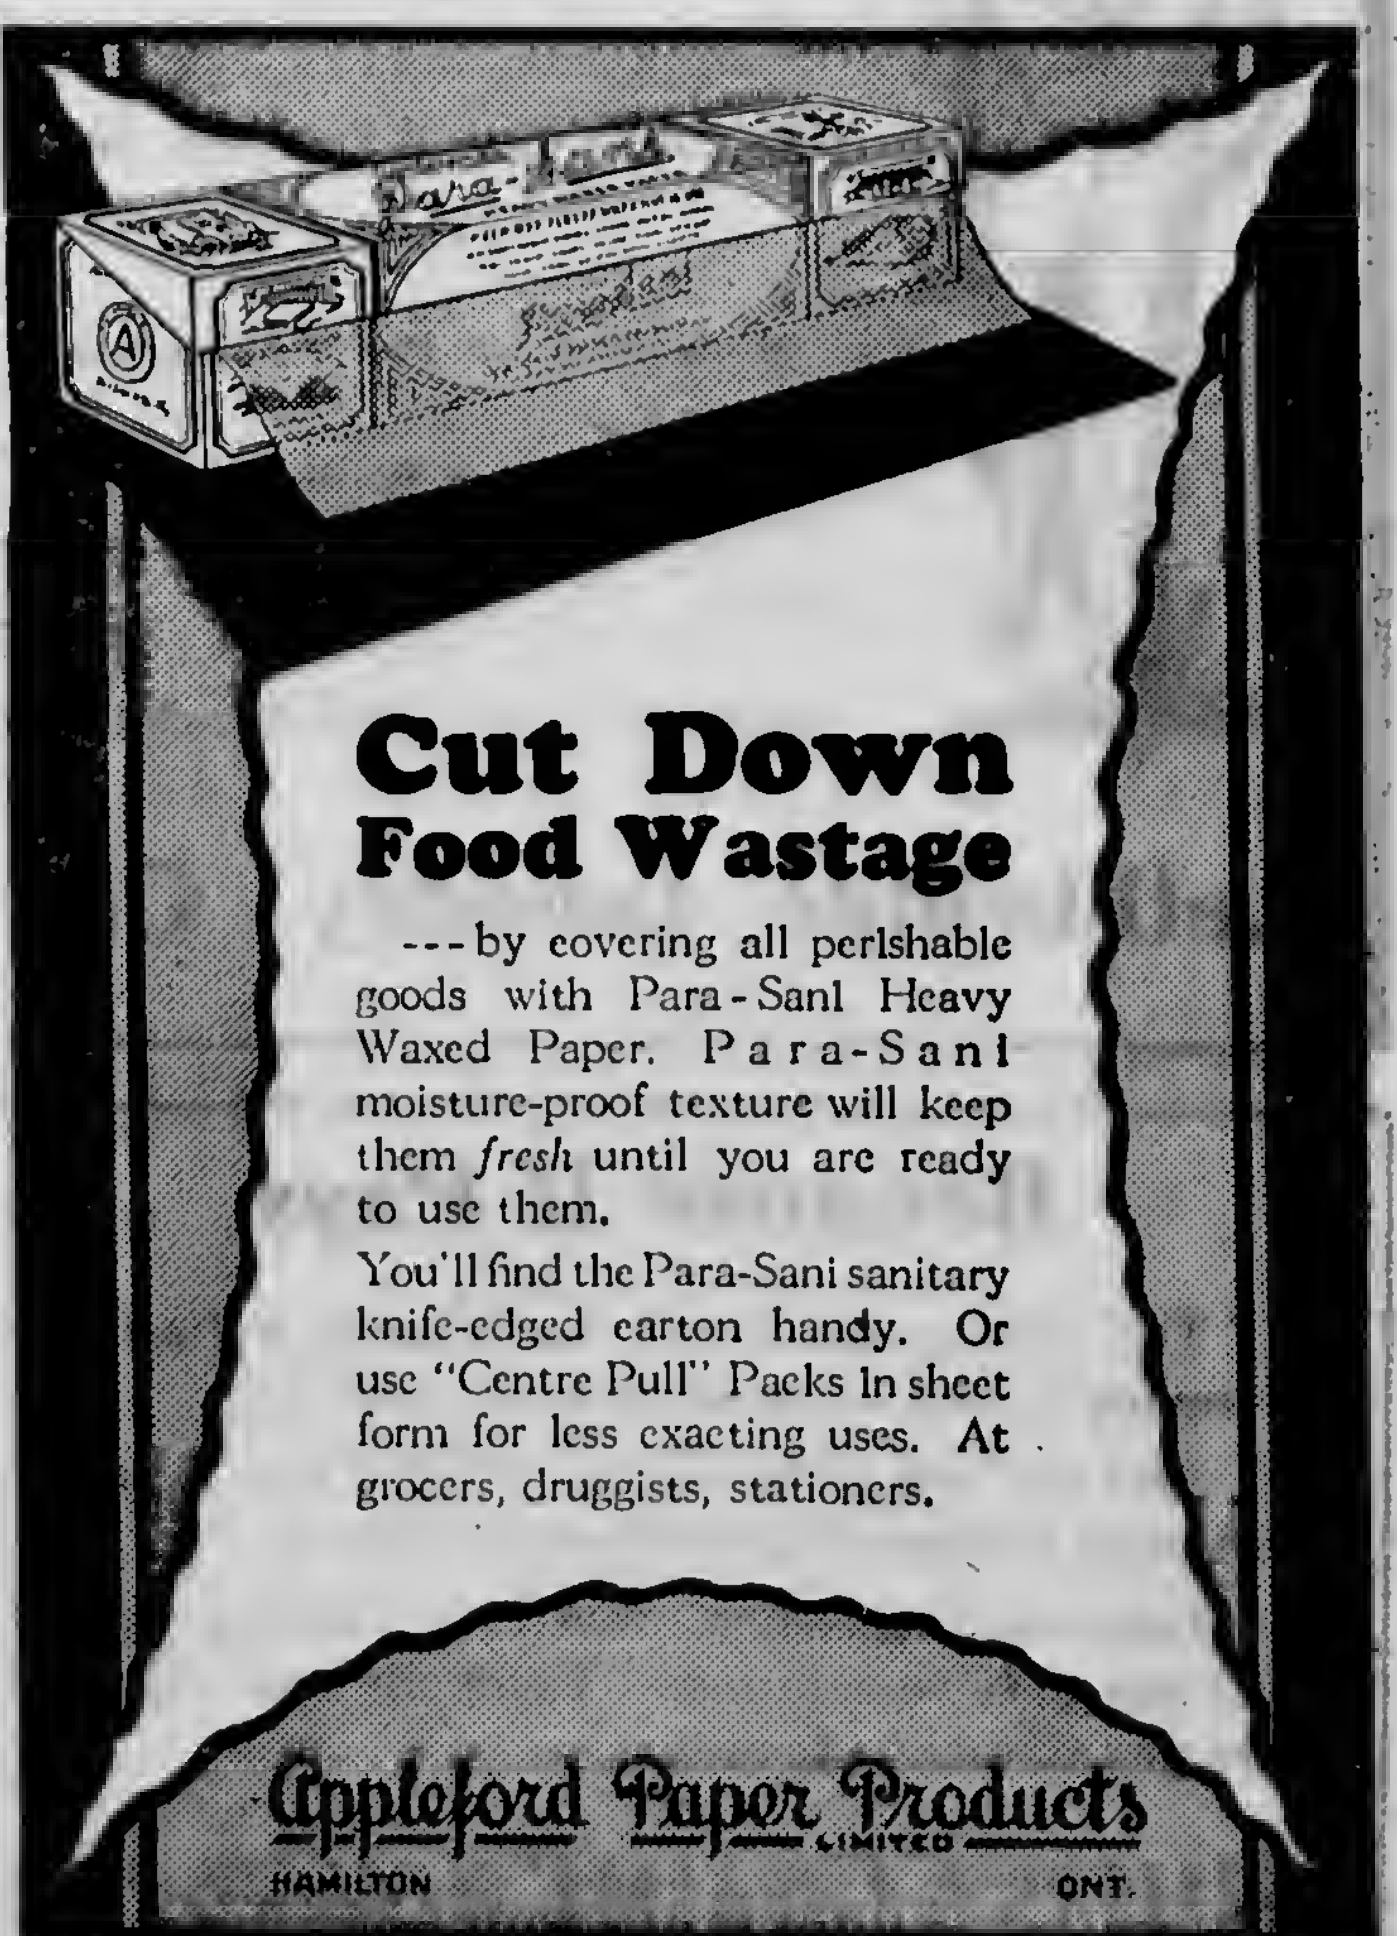

May Become a Burden

Much Happiness Missed When Gathering Wealth Becomes An Obsession

Wealth can be a burden, once it becomes an obsession, as invariably it does. You must always go on and on, making more, once you have started. It is not sufficient to make, say, £50,000 out of a business and then say, "That will do." You cannot stand still. When you have made a good thing out of one business you are impatient to start with the next. Continually, you must fight, for once you are rich your position is being continually assailed. You become obsessed in the fight for its own sake. And in following this obsession, remember, you inevitably forego much of the simpler happiness which might be yours; there is no other way of winning through, and keeping there.

A woman's instinct is that which tells her she is right whether she is or not.

Baby's Colds
Best treated without dosing—Just rub on
VICKS

HUNTER-MARTIN & CO., REGINA, SASK.

A Chunk Of Coal And What Science Will Do With It In The Not Distant Future

(From the Edinburgh Dispatch)
To most of us coal is not an exhilarating subject. We grumble when we have to make up the fire with our own fair hands, we grumble when the scuttle is empty, and we grumble at the fabulous amount of shakels we have to disburse for a few bags of chunky black stuff dumped on the coal-cellar floor. Most of all we grumble when the coalman does not call and the country is in the wretched throes of a coal dispute.

To us a chunk of coal is simply a chunk of coal, and we cannot imagine why 48 nations should confer upon it, or why they should wish to discuss its past, dissect its present and map out its future. Nevertheless, more than 1,500 good men and skilful of the World Power Conference have gathered together in London for that very purpose. Obviously we must pay more respect to that chunk of coal in future, and our children will have to treat it with far more deference than we have been wont to do—that is, if they ever have the chance of seeing and using real and actual coal in days to come.

For these good, skilful fuel scientists are going to do all manner of things with coal that it never occurred to us to do. For one thing, they are going to carbonize it, which sounds dreadful; and, for another, they are going to pulverize it, which sounds far worse. The one thing they are not going to do is to burn that poor chunk of coal in an open grate or under a boiler fire in the way we and our fathers and grandfathers have been doing.

They are going to make us pay more respect, to coal, and yet they are going to give it the thinnest time it ever had, or any other mineral either. They are going to subject it to that last indignity of all, the indignity of scientific classification.

No longer will it be sold by the bag or the truck, but according to its calorific value, or, in other words, its heat and energy content. Moreover, they are going to see that it is thoroughly washed and cleaned. No longer will we have to regard pieces of camouflaged slate and shale as the natural contents of the coal-scuttle.

We have kept the worst till the last.

Chemists and engineers between them are going to invent machines and processes which will squash that chunk of coal with such terrific pressure, and will warm it and warm it to such terrific temperatures, that from sheer lack of stamina it will collapse, liquify, and turn to oil, motor spirit, and so on. This they call by the kindly name of "hydrogenation."

Altogether coal is in for a very bad time, but that will not worry you and me a great deal, simply because we will not have much to do with coal in the future. We will use more gas and more electricity—at relaxed prices, we hope—and also we will use a smokeless fuel provided by the aforementioned carbonization. In this way we will have not only a bright hearth, but bright skies as well—there no longer being any smoke to leech out of the chimney.

It must not be imagined that all this is mere boasting and vain-glory on the part of these fuel scientists. For instance, in Newcastle, an electricity company is able to supply current at one farthing a unit, which is the cheapest recorded in any country in the world, including Sweden and Switzerland, where they make electricity with waterfalls.

The company in question achieves this by the low-temperature carbonization of coal, and by using the resultant solid fuel under the boilers in a super-power station to generate electricity. The value of the by-products obtained by the carbonization is

so great that it practically pays for the original coal, and that is how they are able to supply the current at next to nothing.

That is just one of the things that the scientists can do with a chunk of coal, but it helps to show why in the future it is going to be regarded as something in the nature of a national crime for you and me, who run households, and for those who run works and factories, to buy coal haphazard and simply burn it in the grate or in a furnace.

In fact, the more we go into the scientific possibilities of that very ordinary chunk of coal the more awe-inspiring it becomes, to say nothing of the brains of the scientists who are busied with those possibilities. Already they extract from the coal-scuttle gas and electricity for lighting, heating, and power and transport, fertilisers for the fields, thousands of dyes and colorings, anti-septics, anaesthetics and drugs of all kinds.

The future will see us extracting petrol from coal and beyond that there are still big possibilities at present undefined.

Enchantingly Lovely

The youthfulness of this enchantingly lovely model interpreted in transparent printed velvet, with femininity added by lace collar, and crushed girdle of soft faille silk crepe, will instantly appeal to the woman of "Fashion." The bodice with becoming V-neckline is slightly laced and rather long-waisted to create a flat hip effect. The three-piece skirt is wrapped around, with the right front forming drape, a slender, graceful idea for the woman inclined to be overweight. Style No. 307 is designed in sizes 16, 18, 20 years, 36, 38, 40, 42, 44 and 46 inches bust. The 36-inch size takes but 3 yards of 40-inch material with 3/4 yard of 27-inch all-over lace and 3/4 yard of 36-inch contrasting. Lustrous crepe satin, dull silk crepe, cotton crepe, plain sheer velvet, wool crepe and crepe Roma are interesting combinations. Pattern price 25 cents, in stamps or coin (coin is preferred).

How To Order Patterns

Address: Winnipeg Newspaper Union, 175 McDermot Ave., Winnipeg

Little Willie: "You can't guess what my sister said about you just before you came in."
Algernon: "I haven't an idea in the world."
"That's it. You guessed it the very first time."

A LITTLE COUNTRY PAPER

By Clara McCreary

I get a little paper from a little country town—

A far cry from the dailies, that on Sundays weigh us down;
It's printed every Friday, and it has no supplement,
Nor colored rotogravure, but I'm always glad it's sent.

It gives no clever verses by the syndicated bards,
But states that Mrs. Williams entertained some friends at cards;
"Ye scribe" saw Judge McArthur shaking hands with friends today—
It says the Curtis family sold out and moved away.

On Boulder Dam it's silent, and there's nothing on finance—
It tells that the Rebekahs gave an installation dance.

That Miss Day is returning soon to open up her school,
That Alexander Hargrave lost a valuable mule.

It's glad that Jimmy Gallagher can be around again.

It claims that the alfalfa crop is much in need of rain;

The supervisors voted for the road work to commence;

Will Anderson hauled lumber for his new garage and fence.

The worldly ones may smile at it, but theirs are tender smiles—

These home town items form a bond through many years and miles.

Oh, little country paper, with your little weekly talks!

I like to wander with you down remembered roads and walks.

Phosphate Fertilizer

By-Product From Trail Smelter Proves Its Worth

The Provincial School of Agriculture at Claresholm has just made public the result of an experiment inspired by the Canadian Pacific Railway, namely the use of a phosphate fertilizer, a by-product from the smelter at Trail, B.C. Tests were made on the farms of J. L. Salmon, the Pierce Farm and at the college. The fields were planted exactly the same except that, in each case, one had the fertilizer and the other had not. The former showed a yield of 54 bushels to the acre, and the latter only 46 bushels. In other words, the extra eight bushels per acre were secured at a cost of 90 cents in fertilizer.

Cause For Thankfulness

A minister who was making a sea voyage expressed strong disapproval of the language used by the sailors.

"It's a very bad habit," agreed the captain, "but when there is real danger the lads stop swearing."

Presently the weather grew very stormy and a sailor came into the clergyman's cabin.

"It's terribly rough, isn't it?" said the minister. "Are the sailors swearing?"

"They are," replied the man. "Thank goodness!" breathed the parson.

Australian Oranges

Australian oranges are featuring the shop windows at some points in the west for the first time, giving healthy competition to the fruit of the nearer citrus groves. Early signs suggest that the new fruit is here to stay—adding a fresh chapter to the story of inter-Empire trade.

Greater London increases its population at the rate of 75,000 every year.

NO DOLE FOR HIM

SAMUEL GEORGE DODGE

was a railway porter in England but work was so uncertain that he decided to come to Canada and get something permanent. The Canadian National Railway's Colonization Department found him a place on a Saskatchewan farm. Today, after a few months' experience, he is a landholder and has made up his mind that there is nothing better than farming in the west. He has a homestead near Margo, Sask. "When I go back to England," he says, "it will be for a holiday."

Flooring For Poultry Houses

Cement Floors Are Found To Be Unsatisfactory

Poultry houses on the Charlotte town, P.E.I. Experimental Station flooded with cement gave trouble during winter and spring on account of remaining damp. In an effort to overcome this difficulty 16 feet by 32 feet was given a liberal coating of roofing paint with the idea that it would prevent moisture coming through the cement. This treatment, however, proved of little value, as the litter became damp and unfit for use almost as quickly as where no treatment had been given. In another section a floor of matched lumber was put in and raised two inches above the level of the cement. This treatment proved a success, according to the report of the experiment recorded in the 1927 report of the station, published by the Department of Agriculture, at Ottawa. In this report the superintendent points out that the section with the board flooring remained dry, requiring cleaning only about half as many times as the section of the same house with the cement flooring only.

Promote British Settlement

Plan To Lend Financial Assistance In Uniting Families

The Saskatchewan Government has agreed to co-operate with the Dominion Government in a Federal plan to promote British settlement in Canada by uniting British families, Hon. George Spence, Minister of Railways, announced here following his conference with the Hon. Robert Forke, Federal Minister of Immigration. The plan provides that any British subject who arrived in Canada prior to June 6th last may secure assistance in bringing his wife and family out from the United Kingdom.

Mother: "Yes, he's always up to mischief. I expect 'e'll soon be followin' in 'is father's finger prints."

A man may play first violin in the orchestra, but he usually plays second fiddle at home.

IRVIN COBB VISITS WEST

Irvin S. Cobb says that "when a good duck hunter dies he goes to the Saskatchewan marshes. In these stubble fields and along these meandering sloughs the party of which I am a member have had such sport as we did not think could be found on the continent of North America." Mr. Cobb was a duck hunting guest of the Canadian Pacific Railway at Jansen, Sask. On his way back he stopped over at High River where he is seen being fitted into chaps on the Frazier Hunt ranch.

Largest Passenger Locomotives In The British Empire Are Being Built In Canada

Thirty-one Hundred and One is about to come out of the shops. In one small corner of a bustling city of steel and men, great slabs of asbestos are being bound to her nickel-steel sides. The great drivers and the loading and rear trucks are standing on the track behind, waiting for the shop cranes to lower her from the jacks. In a little while her boiler and her fire-box will be full. Steam will be hissing and that little group of men in white collars who have been poking about for months, will stand exultantly by as the throttle is opened for the first time.

Thirty-One Hundred and One will be the second of the two largest passenger locomotives in the British Empire to be turned out of Angus within two months. Twenty-five hundred men, all of whom have made some contribution to her design or construction will stop and look up from their tools as she moves. It will be a great moment for them, as they take almost as much pride in her, each one of them, as did the office boys and stenographers who warmed the platform of Windsor Station when Thirty-One Hundred made her first appearance.

The largest passenger locomotives in the British Empire! In speaking to the lay man, those gentlemen who have been so busy are very apt to draw attention to this feature. Size is impressive. One might gather too, when Canadian Pacific officers and employees speak with enthusiasm and justifiable pride of them, that a war between the locomotive departments of the railways of the world had just been terminated by an overwhelming victory for the Canadian organization.

This is hardly the case. As a matter of fact, while the size is a consideration in locomotive design, it is by no means the primary consideration, and while the mechanical departments of all railways watch with considerable interest the developments of other lines, the problems of the different roads with respect to power requirements are so different as to leave no ground for comparisons of efficiency. The Thirty-One Hundreds are the largest passenger locomotives in the British Empire, but to the designer and the operating departments of the road, this is incidental. What is more important is the fact that they have succeeded in producing a locomotive capable of efficiently carrying out what is required of it under all conditions, at the same time keeping within the weight and other limitations placed upon it by road-bed gauge and other conditions. They have broken ground in several features, which have required the courage of their convictions, and theirs is the gratification of the pioneer success.

While the design and construction of the Thirty-One Hundreds was no one man's job, to one man fell the job of reducing the requirements to a final analysis, coalescing the many ideas and forming one which would embody the whole. "My job," he says, as he looks with satisfaction and affection at the photograph on the wall. What he did, in collaboration, was, from known practices and older theory, together with advanced and original theory and developments of science, evolve a mechanical giant.

C. H. Temple, whose final and crowning achievement after forty-four years of service with the Company was the creation of this mechanical giant, sat in his office on the tenth floor of Windsor Station. He was Chief of Motive Power and Rolling Stock. The Angus plant was five miles away. He visited the plant occasionally to see that various parts conformed to his ideas and he received daily detailed reports on construction progress, but until the moment of the great thrill, when the turning of the great wheels for the first time proved that the combination of a hundred theories was workable, his main vision, one which ploded the steel shell, was through blueprints and drawings, through logarithms and tables which featured the thousandth part of an inch and discovered ratios of this and that which were vitally interesting to him but not very comprehensive to you or me.

The design of a locomotive is not dictated by a desire to "go one better" in size. The design is dictated by existing traffic demands and on what it is anticipated will be the maximum requirements during the life of a locomotive. Placing that life at an average of twenty-five years it will be seen that efficient designs must be years in advance of the needs of the day. This is the reason for the Thirty-One Hundreds.

For economic reasons, the changes

in freight power have been very gradual. The advance in passenger power, however, has been more rapid, and as the more general use of steel in passenger construction added thirty per cent. to the weight of passenger trains during the past few years the motive power had to be almost revolutionized.

Fattening Hogs

Buttermilk Found To Be Better Than Skim-Milk For Pigs

Buttermilk proved a better feed than skim-milk for fattening hogs at the Rosthern, Sask., Experimental Station. Groups of pure bred Yorkshires, Tamworths, Berkshires, and crosses from these breeds, were used. The lots receiving skim-milk and buttermilk ran on wheat pasture and received rations of 2 parts oat-chop and 2 parts of shorts. The shorts were gradually replaced by ground barley, and at the close of the finishing period the pigs were receiving three-quarters barley chop and one-quarter oat chop. The experiment was conducted for 126 days with both lots.

The superintendent of the station reviews this and other experiments in the report of the station for last year, published by the Department of Agriculture, at Ottawa. It is shown that the buttermilk fed lot made an average daily gain per animal of .185 pounds more than the lot receiving skim-milk. The amount of meal required for a pound of gain was .62 pounds higher in the skim-milk lot, and it required 1.11 pounds more of skim-milk to make a pound of gain than it did buttermilk.

Defective Eyesight Common

Majority Of Urban People Have Poor Vision Says Optometrist

As a result of the great strain on the eyes by the complexity of modern civilization, particularly in connection with urban life, it is estimated that seven out of every ten people in the large centres of population have defective eyesight. Jerry Britton, a consulting optometrist in Montreal, in a recent address in which he produced a moving picture illustrating this, said it was caused by the reaction of the daily demands of urban life upon the delicate organism of the eye. The effect was felt by young and old alike, he said. Human eyes are not adapted to the environment given by modern civilization, according to the speaker.

Badger Farming

New Fur Industry May Be Started In Saskatchewan

A new industry—badger farming—may be started in Saskatchewan by John Rothenberger, farmer, of Vanguard. Last spring Mr. Rothenberger caught a badger and four pups. He built a large pen, about 15 feet long and 4 feet wide. During summer he fed the badgers until they are now quite tame, and are said to be larger than any badger running wild. Their coats are in excellent condition and offers of \$18 for each skin have been received.

Boy: "Fifth floor, please."
Elevator Man: "Here's your floor, son."
Boy: "How dare you call me son? you're not my father."
Elevator Man: "I know, but I brought you up, didn't I?"

Landlady: "They tell me there's a hypnotist in town who makes people eat candles and drink paraffin."
Brutal Boarder: "What boarding house does he keep?"

"Don't you believe in owning your own home?"

"In theory, but look at the relatives that live with us."

He: "Who is that old lady?"
She: "Me, taken twenty years ago."—Moustique, Charleroi.

"Take this cake, my poor man!"
"You are too good, madam!"
"No. This sort makes me sick!"—Moustique, Charleroi.

Cuticura Treatment For Dandruff

Part the hair and gently rub in Cuticura Ointment until the whole scalp has been treated. Let the ointment remain on for some time, over night if convenient. Then shampoo with a suds of Cuticura Soap and warm water. (Do not rub soap on the hair.) Rinse thoroughly. A light application of Cuticura Ointment to the scalp between shampoos is often beneficial.

Sample Each Free by Mail. Address Canadian Depot: "Winnipeg," Ltd., Montreal. Price, Soap 25c. Ointment 25c and 50c. Cuticura Shaving Stick 25c.

WORLD HAPPENINGS BRIEFLY TOLD

China has invited the Royal Netherlands, Indies air lines to organize a flight to Java and China. The flight is expected to take place early in 1929.

The Dairy Federal Department of Agriculture reports that for the eight months ending August 31, Canada exported milk and milk products to the value of \$18,482,518.

A chair and couch, once the property of Sir John A. Macdonald, Canada's confederation premier, were sold for \$8.50 each in a Toronto auction room.

The British Columbia government exhibit for the Royal Winter Fair, consisting of fruits, vegetables, grains, grass seeds and other farm products weighed nearly 14 tons.

Lord Byng, as executor, gets £1,000 under the will of Lady Byng's uncle, Pandeli Ralli, while Lady Byng herself gets the bulk of the fortune of £557,000.

As another step towards augmenting its new western service, the Western Canada Airway Ltd. have placed two monoplanes in operation on its prairie passenger and express line.

The Japanese war office has asked for an appropriation of \$2,750,000, spread over a three-year period, for use in perfecting air defenses at Kyoto, Osaka and Northern Kyushu.

The post of American ambassador to England may be offered to Myron T. Herrick, present United States ambassador to France, according to an unconfirmed report circulated in Paris.

The treasury board and cabinet council having approved the absorption of the Standard Bank of Canada by the Canadian Bank of Commerce, on recommendation of the minister of finance, the Standard Bank has gone out of existence.

Worms feed upon the vitality of children and endanger their lives. A simple and effective remedy is Mother Graves' Worm Exterminator.

Furnished Some News

"Look, Tita; something about me in the paper."

"Really? What does it say?"

"It says, 'In the month of July the trolley company carried 15,738,526 passengers—well, I was one of them, wasn't I?'"

Professor A (in high-powered car careering madly round a bend) — "We've got it at last."

Professor B — "G-g-got w-w-w-hat?"

Professor A — "Perpetual motion. I c-can't stop this car."

Only One Chance In Thirty-Six Billion

Farmer In Manitoba Loads Wheat Twice In Same Car

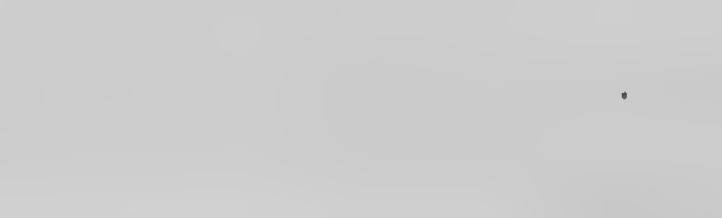

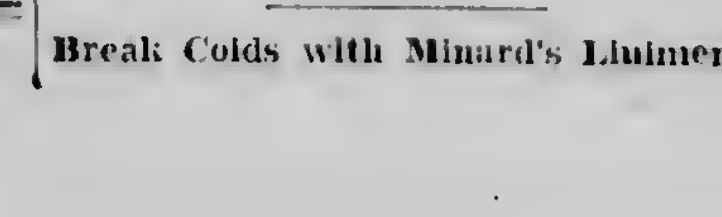

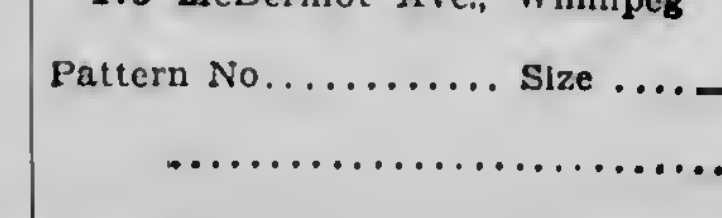

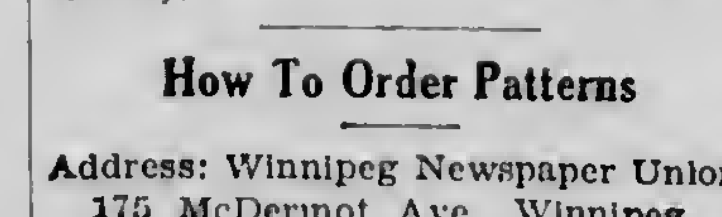

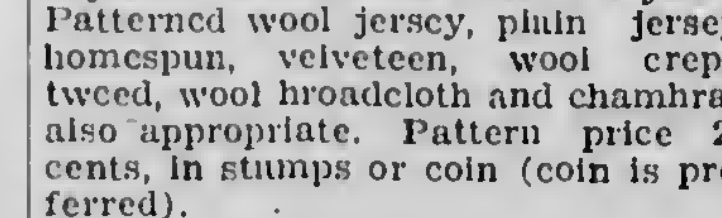

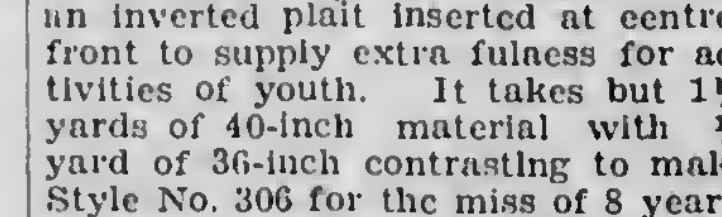

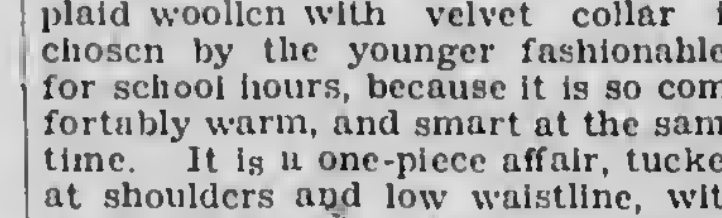

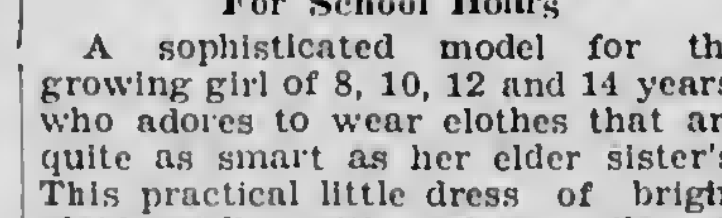

There is one chance in thirty-six billion of it happening again.

At the town of Argue, Manitoba, on September 20, a farmer named C. R. Sommerville, loaded part of his crop of Number 2 Durum into Canadian National Car No. 423871. The car went to the head of the lakes, was emptied and started west again. On October 1, eleven days later, it left the same station, Argue, loaded with grain from the fields of the same farmer, C. R. Sommerville. This time the wheat was Number 4 Durum, but the car was the same and the farmer was the same.

T. P. White, Canadian National Railways' superintendent of car service, thinks the incident is a reflection on the smoothness with which the great machine of grain transportation, handling millions of bushels, is running. But he realizes that it will never happen again in his lifetime.

From statistics as to the number of box cars and shipping stations in the west, and taking an average of 75 farmers who might possibly load at a point like Argue, it has been calculated that there is one chance in thirty-six billion of a car going back to the same shipper at the same point.

Don't fall in love—the fall may break your heart!

Badger Skins Are Valuable

Pelts Should Be Taken In the Right Season, However

Badger skins, if taken off animals at the right season, and not spoiled in handling, are now quite valuable. At the recent fur auction in Winnipeg the best badger skin sold for \$52.00, and a good average skin is worth, perhaps, about \$20.00 to \$25.00. But many people are taking these pelts during the late summer and fall, when the skins are worthless, or practically so. Badger skins are most valuable after the animals have come out of their winter retirement. Skins taken in the spring are valuable; those taken in the fall are almost worthless. About twenty thousand badger skins are marketed annually in the three Prairie Provinces.

Prominent Health Officials

Four prominent Canadian health officials have been appointed to the Connaught Laboratories Fellowships in the School of Hygiene, of the University of Toronto. They are Dr. R. B. Jenkins, Edmonton; Dr. F. W. Jackson, Winnipeg; Dr. F. S. Leader, Battleford, Sask.; Dr. Eva Mader, Kentville, N.S. The fellowships were established last year for the purpose of increasing the number of public health workers in Canada.

CHILDHOOD AILMENTS

Can Be Quickly Banished With Baby's Own Tablets

The ailments of childhood are many but nine-tenths of them are due to one cause and one cause only—a disordered condition of the stomach and bowels. To quickly banish any of the minor ailments of babyhood and childhood the bowels must be made to work regular and the stomach must be sweetened.

No other medicine for little ones has had such success as Baby's Own Tablets. They banish constipation and indigestion; break up colds and simple fevers; correct diarrhoea and colic and promote healthful sleep by regulating the functions of the stomach and bowels. Concerning them, Mrs. L. M. Brown, Walton, N.S. writes:—"I cannot speak too highly of Baby's Own Tablets as I have found them excellent for childhood ailments."

Baby's Own Tablets are sold by medicine dealers, or by mail at 25 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

A Snappy Comeback

Mum—Forgot it—huh! Halways forgettin', you are! Tell you men hanthying and it goes in one ear the hout the bother. Dad (stung to protest)—Tell you women anything, and, by gum, it goes in both ears, and never stops coming out your bloomin' mouths.

Family trees aren't like others. In others, appearance of the sap is an indication of continued vigor.

Minard's Liniment Heals Cuts and Bruises.

Loud Speaking Airplanes

New Form Of Advertising Making Cities More Noisy

The advance of aviation has brought with it one development that cannot be regarded with equanimity.

In New York certain airplanes equipped with loud speakers fly over the city and indulge in outdoor advertising at its worst. Voices from these flying loud speakers bawl forth the merits of this or that face cream, movie, cigarette or what-not in a manner that can be heard all over the town. There is no escape from it. Any one in the streets below gets this raucous appeal to buy drummed into his helpless ears, whether he likes it or not.

Our cities are noisy enough now. It might be a good thing to see if the statutes governing public nuisances cover the case.

Took Drastic Measures

The fact recently has come to light that the very oldest newspaper in existence is, or was, the official "Pekin Gazette," which is said to have been produced continuously for more than a thousand years. But this Methuselah among newspapers not only claims an honorable old age. It claims a record in martyrdoms as well. It is credibly stated that during its publication no fewer than 1,500 of the paper's editors have been executed. If this is correct, just imagine what the slaughter must have been among reporters.

Husband (reading latest about radio-televison): "My word! This opens up some wonderful possibilities, dear."

Wife—"Yes, my love! Won't it be nice for me to be able to sit here and watch you working in your office when you're kept there at nights!"

Grocer—"Yes, lady, these eggs are fresh from the country."

Suspicious Customer—"What country?"

Break Colds with Minard's Liniment.

When Capt. Malcom Campbell completed his world's record automobile drive at Daytona Beach, his first request was for a cup of "good, strong tea." The courageous Captain would have enjoyed Red Rose Tea because it is a blend of choicest Assam and Ceylon teas, whose characteristics above all others are strength and flavor, packed by men trained in the London tea markets. Sold by your grocer in clean, bright aluminum packages.

Northern Alberta Boys' and Girls' Swine Club

First Prize In C.P.R. Competition Won By Members Of Club At Willingdon

First prize in the Canadian Pacific Railway Competition in the Boys' and Girls' Swine Club show for Northern Alberta, was won by Parafte Lazaruk and Harry Strynadka, members of the Swine Club, at Willingdon, on the New Canadian Pacific Railway Cutknife-Whitford line.

Second prize went to Benny Flaads and Bernie Kobitzsch, of the Hardisty Club, and third, Thurston Smith and Erwin Berguf, of the Sedgewick Club.

Handsome medals were presented to members of the winning team by Superintendent George Fox, of the Edmonton Division of the Canadian Pacific Railway. Both members of the team are of Ukrainian descent and are sons of prosperous farmers in the district. Each of the boys is 17 years old. Strynadka is in grade ten at Desjardis school, and Lazaruk is working on his father's farm.

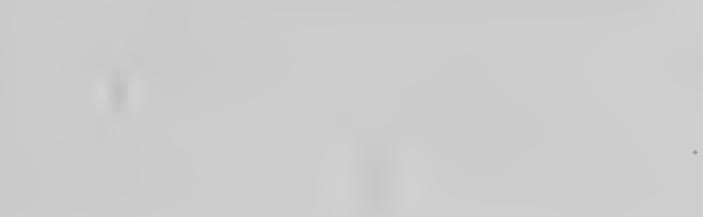

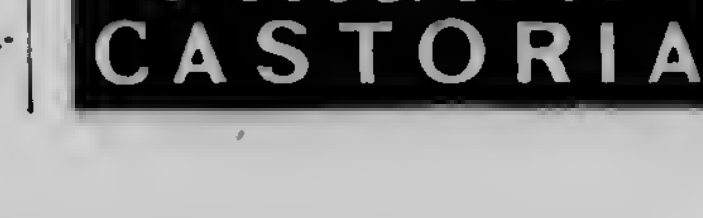

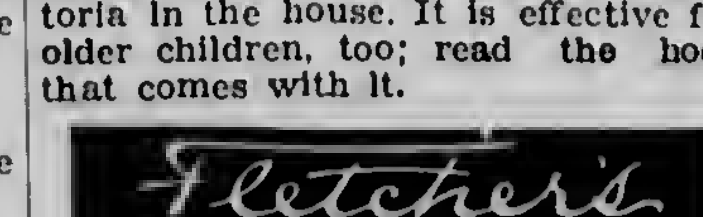

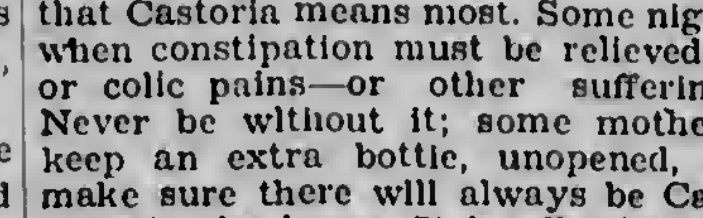

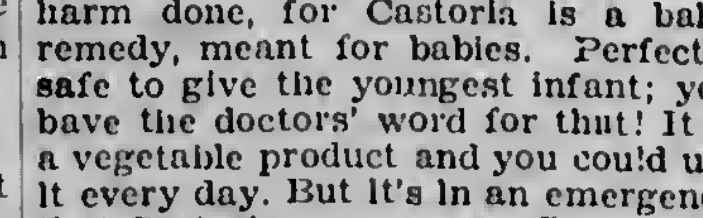

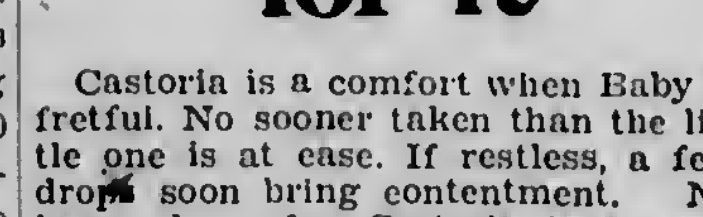

The Willingdon team will proceed to Calgary where they will compete with the winners of the Canadian Pacific Railway competition in the southern part of the province, for the trophy awarded to the highest scoring team from any point along Canadian Pacific railway lines in Alberta, and a trip to the Toronto Royal as guests of the railway.

Local officials of the railway companies, of Provincial and Dominion departments of agriculture and livestock interests, are well pleased with the successful results of the Boys' and Girls' Club work during the past season, and credit is given to these clubs for much of the improvement noted in recent years in the quality of hogs shipped to market from many districts in the province.

His Explanation

District Visitor—To what do you attribute your great age? Oldest Inhabitant—Well, for the first seventy years of my life there wasn't no motor cars, an' for the last thirty years I've been confined to the house.

More than 2,000,000 women in Soviet Russia are members of trade unions.

SUNDAY SCHOOL LESSON

NOVEMBER 18

PAUL'S EXPERIENCES IN JERUSALEM

Golden Text: "Be strong, in the Lord, and in the strength of His might."—Ephesians 6.10.

Lesson: Acts 21.17-23.35.

Devotional Reading: Ephesians 6.10-20.

Explanation and Comments

Paul's Request, 21.37-39.—Read the earlier verses of this chapter. Paul is standing on the stairway leading from the outer court of the temple up to the Tower of Antonia, and before him is Claudius Lysias, chief captain of the band. "May I say something unto thee?" courteously Paul asked, speaking in the Greek language. In surprise Lysias asked in his turn, "Dost thou know Greek?"

"And was it not a needless surprise? Paul was a university man. He had one of the greatest brains of his time. We all often reproduce the role of the Chief, Captain. We were amazed how well read and intelligent was that unassuming man. But our surprise was needless. Assumption is not culture. The spiritual quality of men and women often surprises us. We say, 'I never thought that man was such a Christian.' 'I never dreamed that woman could have been such a heroine amid sorrow.' But we did not know them any more than Lysias knew Paul. And we did not know their inner life of devotion to the Saviour of the world. We knew not their prayers, their unseen sessions with their Bible, their gracious investiture with the Spirit of Christ."—Dinsdale T. Young.

"Give me leave to speak unto the people"—this was Paul's request of the Chief Captain. "Get me safely out of this away from this mob," would have been the anxious plea of most men in Paul's position, and perhaps it was surprise which led Lysias to allow Paul to speak to the howling Jews below him.

"Great duties are before me, and great songs!"

And whether crowned or crownless when I fall, It matters not, so as God's work is done."—Alexander Smith.

Paul's Address, 21.30 to 22.21.—Then Paul, torn and bleeding as he was, and chained to two soldiers, stood upon the stairway above that howling mob who were thrashing for his blood, himself perhaps, the only calm man there, and addressed them in their own language, Aramaic, a dialect of the Hebrew. He defended himself from the charge that he was an enemy of the people, of the law, and of the temple. He told them that he was an Israelite, and though born in Tarsus he had been educated in Jerusalem, at the feet of their famous rabbi Gamaliel. He had been most zealous in persecuting the Christians, had even started for Damascus with letters from the Sanhedrin allowing him to seize and bring back in chains all the Christians he could find. Many of those to whom he was speaking must have known and recalled these facts. Next, he wished to defend his Christian faith, and he told them about his wonderful conversion, about his interview with Ananias and the restoration of his sight, and about his return to Jerusalem and his baptism. If the Crucified Jesus had appeared to him in such power, then he must be the Messiah whom he, as a Pharisee, had so longed to see; and if the Risen Jesus is really the Messiah, then Paul must as a righteous Israelite, yield him willing obedience and bear his witness for him.

Yet another aim had Paul, the aim of all his preaching. He would win even that mob over to a favorable opinion of this Jesus who could change in a moment of time a bigoted Pharisee into an active Christian. And finally, he justified his work among the Gentiles as the fulfilling of the express command of his Lord.

Recipes For This Week

(By Betty Barclay)

VEAL BIRDS

2 pounds veal steak (sliced about ½ inch thick).

Cut steak into six to eight squares, depending on the size of bird desired. Marinate with salt and pepper. Place a heaping tablespoonful of Piquant stuffing on each veal square and skewer securely using at least four skewers for each bird. Brown in deep fat first and then place in roasting pan in which frying fat has been poured. Add 1 cup water, cover roaster and let bake in slow oven for an hour. (Enough for six or eight veal birds).

A BRAND NEW RAISIN SAUCE

½ cup chopped nectars raisins.
2 tablespoons butter.
2 tablespoons flour.
1 teaspoon salt.
¼ teaspoon pepper.
Speck cayenne pepper.
1 tablespoon brown sugar.
1½ cups water.

1 tablespoon grated horseradish.

1 small lemon, juice only.

Heat food chopper in boiling water and put raisins through using medium cutter. Melt butter in saucepan, add flour, salt, pepper, cayenne, and brown sugar. Mix well, add water and cook until mixture is thick, stirring constantly. Add chopped raisins, horseradish and lemon juice. Serve hot.

Since ignorance is bliss it seems folly to establish night schools.

Coughs soon stop with Mathieu's Syrup

OF TAR & COD LIVER OIL

Sold in generous size bottles by druggists everywhere.
The J. L. Mathieu Co., Props., Sherbrooke, Que.

Tomb Of Columbus Found

Mementoes Indicate His Burial Near Badajoz, Spain

A commission sent by the Academy of History to investigate what is claimed by some to be the tomb of Christopher Columbus, at Oliva de Jerez, forty-five miles south of Badajoz, Spain, reported that there were traces in the Church of Santa Maria Grecla, indicating mementoes of Columbus. The commission also stated that a number of stones had been found with the inscription: "Here lies Christopherus Sanchez Enriquez, Grand Admiral of the Oceans and the Lands by Him Discovered, born 1441." Enriquez is contended by some authorities to have been the real name of Columbus.

Canada's Pacific Gateway

Vancouver Rapidly Becoming One Of North America's Busiest Ports

Ships in the port of Vancouver took 80,000,000 bushels of last year's Canadian grain crop for export to markets abroad. It is estimated that Vancouver's share of the record harvest this year may be nearer 120,000,000 bushels. This splendid shipping business out of Canada's Pacific gateway has grown from 1,500,000 bushels in 1921. As fast as new elevator accommodation is made available, an increasing volume of wheat from Alberta and the western part of Saskatchewan is being poured into ships on the Pacific Coast. Much of it is carried south through the Panama Canal to Europe. Other grain-laden ships are heading out across the western ocean to Japan. Vancouver may well look forward with optimism to becoming one of North America's busiest ports.

In addition to attracting an increasing proportion of the present Canadian wheat crop, it is quite probable that Vancouver will become the port of a magnificent new expanse of farming land in the Peace River country, north of Edmonton. The Peace River flows across northern Alberta into Lake Athabasca. The farming country named after the Peace has an area of about 47,000,000 acres. It is, in part, in the same latitude as Scotland and Denmark. Some of the settlers in the Peace River country are raising wheat in crops of 70 bushels to the acre.

Crop Estimates

The Northwest Grain Dealers' Association estimates this year's wheat crop at 558,459,600 bushels, and that of other grains as follows: Oats, 317,714,800 bushels; barley 91,375,000; rye, 11,809,000, and flax, 5,079,200.

"What are you doing in that tree, professor?"

"I'm hanging myself."

"But you must put the rope around your neck."

"I tried that, but I could not breathe."

Teacher—Wby, Marie! How can you come to school when your little brother has scarlet fever?

Little Marie—Well, Miss Brown, he's only my half-brother.

LADIES WANTED—To do plain and light sewing at home, whole or spare time. Good pay. Work sent any distance, charges paid. Send stamp for particulars. National Manufacturing Co., Montreal.

KOTAB relieves the congestion, tones the nerves, and renders circulation normal. Write, enclosing price \$3.00 for full size package in plain wrapper.

UNITED SALES COMPANY
311 Confederation Life Bldg., Winnipeg

Peasant Government Is Now In Control Of Destinies Of Rumania

Bucharest, Rumania.—After 50 years of almost uninterrupted rule by powerful capitalist and land interests, greater Rumania, with its agrarian population of 16,000,000, passed recently into the hands of a peasant government led by Iuliu Maniu.

"It is a triumph of constitutionalism over despotism," declared Maniu enthusiastically as he bounded down the palace steps after the regency had given him the mandate. "In the future our country will be governed by a parliament elected honestly by the people and not by a professional political clique."

Huge crowds gathered outside the palace and the modest home of Maniu and gave the new premier a tremendous ovation.

The designation by the regency of Maniu to form a cabinet after Nicholas Titulescu had failed caused profound gloom among the Liberals, who throughout the day had been in blissful expectation of being summoned by the regency as the only party capable of solving the crisis which had endured for a week.

Scarcely any member of the new "people's ministry" has had experience in national public office, so that the rural government's accession to power presents a rare experiment in modern democracy and political science.

When the regency entrusted Maniu with the mandate the Transylvanian lawyer acted with characteristic promptness. Drawing a type-written list from his pocket, he said, "here is my cabinet. I am ready to assume the government immediately."

The cabinet will be as follows: Premier, Iuliu Maniu; foreign minister, Valdo Voevod; industry, Michael Popovici; agriculture, M. Mihailachi; justice, M. Junian; labor, M. Jomitescu; education, M. Bocu.

More than 700 students are enrolled in the four provincial farm schools in Alberta.

Navigation Through Hudson Straits Closed

Dispatch From Fort Churchill Indicates Harbor Is Frozen Over

Ottawa.—Navigation through the Hudson Straits is closed for the winter, it was learned at the Department of Marine by wireless dispatch from Fort Churchill, which indicates that the harbor is frozen over and there is ice as far as the eye can reach. As a result the ice breaker Montcalm has been ordered to return to Quebec City from Port Burwell.

For several months the Montcalm has been carrying on ice observations in the North and is the last ship to leave Hudson's Bay.

There is no ice in the straits themselves, it was stated. With the closing up of the harbor at Churchill, however, the work of the Montcalm is completed.

Several men are remaining at the various radio stations throughout the straits and will continue sending reports on ice and fog conditions.

Manitoba Wheat Pool Meeting

Brandon, Man.—Three hundred delegates together with a large number of visitors attended the fifth annual meeting of the Manitoba Wheat Pool held here under the chairmanship of Colin H. Burnell, president of the Pool. The directors' report was favorable though it was pointed out that the crop had been somewhat poor both in grades and quantity obtained, particularly in the oats.

Many Labor Candidates

London, Eng.—Right Hon. Ramsay MacDonald, leader of the Labor party, has announced that the party had decided to fight every seat where it had local party organizations prepared to run a candidate at the forthcoming general elections. He estimated that the party would have 600 candidates in the field.

Make Arrangements For Important Conference

Agricultural Leaders and Canadian Chamber Of Commerce To Meet In Toronto

Montreal.—The conference which agriculture leaders with the Canadian Chamber of Commerce is arranging for November 27, in Toronto, promises to be an event of economic significance and a forward move in the effort which the chamber is making toward the co-ordination of agriculture and the other business interests of Canada, said Dr. John W. Ross, chairman of the executive of the Canadian Chamber, here.

The invitations which have been issued to each of the heads of the provincial departments of agriculture and to the department of agriculture of Ottawa to participate in the round-table conference have in each case been accepted, said Dr. Ross.

Although no set speeches or papers were to be prepared, the agenda would include a frank and friendly discussion at the conference itself on such subjects as the service which could be rendered the agriculturist through showing him the value of reducing production costs, more efficient farm management, better marketing methods, wider markets and reforestation, and a setting-up of a national agricultural committee of the chamber to advance agriculture in a business-like way.

Russia Needs Wheat

Will Soon Be Placing Orders With Canada Is Report

London, Eng.—A possibility of further orders for the Canadian Wheat Pool from the Union of Soviet Republics has been reported by The Morning Post, which says this is the impression of grain brokers on the Baltic Exchange.

According to the newspaper, information secured by brokers in Britain from travellers and sea captains leads them to believe that the situation in Russia is far worse than generally reported and that the Soviet will resume buying wheat from abroad as speedily as possible before ports become frozen.

In this connection it is recalled that Russia bought 200,000 tons of wheat early this year, following which order there came a halt. The object of this buying is now attributed to a desire to force the hands of the rich peasants, who were withholding stocks. In the present case, however, a serious shortage is believed to exist. How far the convictions of these brokers are justified, it is impossible to tell, and so far there has been no definite indication that Russia is going to resume buying. Nevertheless, The Morning Post is apparently convinced.

Air Mail Service Profitable

Montreal.—Justification for airmail passenger service between Montreal and New York via Albany, is found in the statement for October which shows a net profit of \$3,000. During the month 25 passengers, 10,885 pounds of mail, representing 34,206 pieces, were carried, and a total of 21,877 miles flown. The gross receipts approximated \$17,000.

Abandons Irish Channel Swim

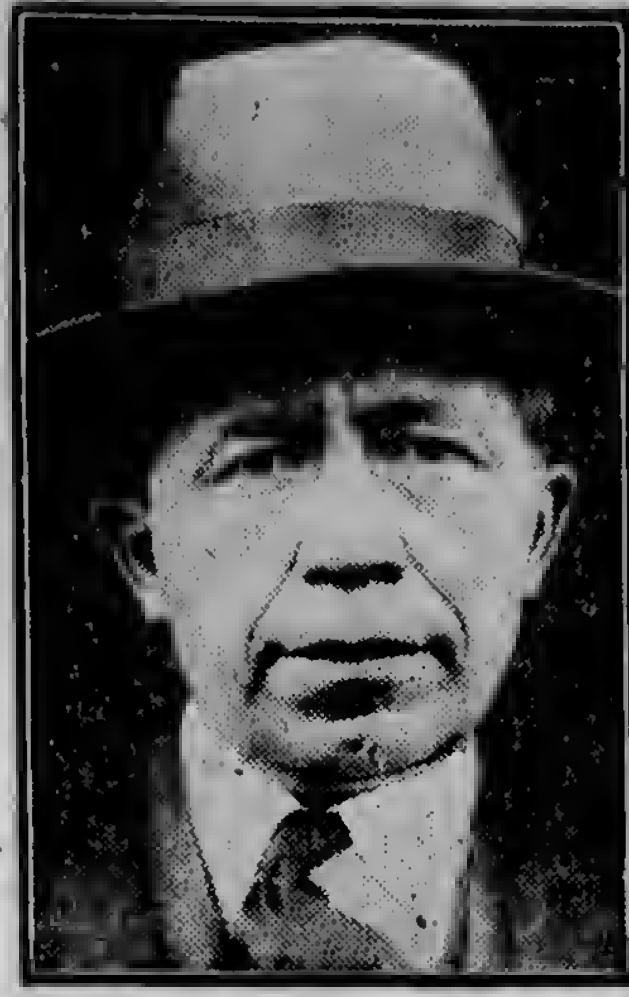

Donaghadee, Ireland.—Mercedes Gleitz, London swimmer, failed in her attempt to swim the Irish Channel on account of the rough sea. When forced to abandon her attempt she had covered 10 of the 22 miles in three and one half hours.

PLENTY OF ROOM IN CANADA

For the wives and families back in the homeland it is often a story of patient waiting while the husbands and fathers win a new start in the Canadian west. But the re-union is happy and the future bright when they are once more joined in the new home. Here is a group comprising two families of Swedish colonists, Mrs. Eriksson with her family of ten children and Mrs. Siden with five children, who have just been sent forward by the Canadian National Railways' Colonization Department and the Swedish-American line, to their husbands at Junkins, Alberta, one of whom settled here in 1925 and the other last summer. The statement is made that many more Swedish families of this fine type are expected to follow.

FAVORS NORTHERN AERIAL ROUTE

Vilhjalmur Stefansson, the explorer, now touring Canada, who predicts that Canada will be the crossroad of the air between Europe and the United States. He says that if trans-Atlantic fliers desire to avail themselves of the shortest course between Europe and the United States, they must fly across Canada. This, he said, would entail flying over Arctic ice and he declared that the northern route was much to be preferred.

Pleased With Canadian Trip

Sir Austen Chamberlain Regrets Shortness Of Stay

Toronto.—Much improved in health, Right Hon. Sir Austen Chamberlain, British secretary of state for foreign affairs, arrived here, accompanied by Lady Chamberlain and his two children, Diane and Lawrence. While the visit was of a private nature, the distinguished statesman was honored at several functions. At the University of Toronto, honorary degrees were conferred on Sir Austen and Paul Claudel, French ambassador to the United States.

The British statesman declared that his health was greatly improved. He was thoroughly enjoying his trip across the Dominion, his only regret being that his stay was so short. He was particularly pleased with the manner in which his wishes regarding interviews had been respected by representatives of the press.

Prevention Of Tuberculosis

Changes Are Foreshadowed In Methods Used To Curb Disease

Toronto.—Various changes of sweeping character in the methods employed to curb tuberculosis throughout Canada are foreshadowed as a result of the study of European methods made by 32 Canadian doctors, including Dr. J. H. Elliott and Dr. Dobbie of Toronto.

One of the possibly outstanding changes will be the development of a Dominion department to have control of tuberculosis prevention work throughout the Dominion, and another equally important innovation probably will be legislation providing for substantial grants for the carrying on of the work.

Loses Valuable Horses

Toronto.—Three champion hunters and five young horses which were about to be trained for the saddle, were suffocated when a fire broke out in a stable here. Five of the horses belonged to D. McGregor, well-known Toronto horseman. The champions were Fairplay, Aristocrat, and Slipper. The animals were valued at approximately \$10,000.

Mount Etna Eruption Worst Of Its Kind In Modern History

Find Oil Shale In North

New Discoveries Are Reported Near Hudson's Bay Junction

The Pas.—Mining men in The Pas district are much interested in reports from Hudson's Bay Junction, Sask., indicating new finds of oil shale 25 miles southeast of that village.

The discoveries have been made in the old Porcupine Hills forest reserve and are close to the Manitoba boundary. Geologists representing a Toronto engineering company have been on the field for some weeks.

Oil shales found in the new area are reported to have a greater potential value than the discoveries made in recent years in The Pas hills north of the junction. Tests made of oil shales west of The Pas have been interesting, but no effort has been made to produce oil in that area.

Becoming Serious Problem

Speech From Throne Indicates Unemployment On Increase In Britain

London.—The reference in the speech from the throne at the opening of parliament to heavy expenditures necessitated by unemployment has drawn attention to the increasing seriousness of the problem. An increase of 31,000 in the unemployment figures was reported, the total now aggregating 1,375,000.

The unemployment assurance fund, which is only solvent when unemployed approximate one million, is at present suffering from a deficit of nearly \$150,000,000. In this connection a new bill introduced in the House of Commons, authorizes the borrowing of not more than \$200,000,000.

Labor Meets Reverses

Party Failed To Gain Much Success In Scottish Municipal Elections

Edinburgh.—Labor after widespread victories in the English municipal elections staged a keen fight in the Scottish municipal elections, but failed to gain much success.

In Glasgow, Labor made a net gain of one seat. Elections in Edinburgh, Aberdeen, Dundee and Greenock resulted in gains of three seats by the moderates, who have majorities in a large number of places.

The moderates also captured four seats, two each from Labor and Communists—at Leochelly in the heart of the Fife coal fields.

Storm Sweeps Alaska City

Thirty Thousand Dollar Property Damage Reported At Cordova

Cordova, Alaska.—Property damage estimated at \$30,000 was counted following the worst storm in the history of the city. The greater part of the damage was to the new school building. The roof was blown off, and torrential rains poured into the unprotected building, ruining every room. Flying wreckage from the building broke hundreds of windows.

The wind tore telephone poles from the ground and took the front off a hotel building.

Catania, Sicily.—Mount Etna spouting forth the worst trail of destruction in its modern history continued to visit its fiery wrath on hamlets clustered along the base of its slopes.

The last three standing structures in the village of Mascali toppled and fell before the rush of molten rock which poured down from the volcano and obliterated the town.

Panic-stricken inhabitants of Fiumefreddo fled their homes, although they were in no immediate danger.

The main stream of molten rock increased the speed of its descent as the main eruptive mouth opened a large fissure which resembled an incandescent ravine.

The month shot forth fire and destruction along its steep sides and then subsided as lava halted temporarily on the outskirts of Fiumefreddo.

Experts said that certain aspects of the eruption were comparable to the one which destroyed Catania in 1619. Measures were adopted to continue electrical lighting and power along temporary transmission lines should the present aerial high voltage lines to this city be interrupted.

Another flow of lava menaced the village of Nunziata. It had halted on the outskirts of the town, but if it continued its advance as was expected, the river of melted rock would destroy Nunziata and also the hamlet of Carruba, which already has been evacuated.

The lava stream which rushed through Mascali has advanced nearly twenty miles over a front 200 yards wide. It was less than four miles from the ocean.

Another river of lava has entered the sea north of Riposto, sending up great clouds of steam and causing sudden explosions.

With a molten stream of lava like a hungry dragon at their backs to spur them on, hundreds of persons are fleeing from the region around the Eastern base of Mount Etna.

Their household belongings were thrown on any makeshift vehicle to get them out of the advancing column of fire. Barnyard animals straggled along with the people, who were abandoning their fields and homes to the molten stream which advanced at a rate of more than 100 yards an hour.

The most fertile and intensively cultivated land in Sicily was being consumed by the lava. Houses were being destroyed and trees burned.

Catania, Sicily.—A stream of molten lava pouring from Mount Etna was sweeping through the town of Mascali and the fertile countryside, leaving destruction in its wake.

The lava struck the town of 10,000 inhabitants just after the townsfolk had finished celebrating the fete of their patron Saint, Leonardo, whose statue was carried on the shoulders of four old men.

Moving forward, crushing houses, vineyards and rich farm lands, the main lava stream had joined with several others from the crater and was nearly 14 feet thick and more than a mile wide. Houses crumbled under the intense heat before the lava reached them and trees were withered and destroyed while the stream was still one hundred yards away.

British Parliament Is Formally Opened With Colorful Ceremony

London, Eng.—Parliament was formally opened by the king with all the colorful ceremony surrounding the occasion. The session is the last before the next general election. In the speech from the throne, His Majesty expressed gratification at the signing of the anti-war pact, outlined a scheme for relieving agriculture, industry and railways of local taxes, a scheme for enabling railways to reduce charges on basic traffic and a plan to alleviate mining area unemployment by training 20,000 miners a year for agricultural pursuits in the Dominion.

The subsequent debate on the address in reply to the speech was featured by the attack of Rt. Hon. Ramsay MacDonald, Labor leader, on the Anglo-French proposals for further naval limitation. He termed it an "agreement not to limit armaments"

and pressed Premier Baldwin for a full government statement on the present status of the agreement. The premier, however, pointed out the Labor party was to move an amendment censuring the government on account of the pact and therefore any government statement should be reserved for the debate on this amendment.

In the course of his speech, Mr. MacDonald mentioned the movement of miners to the Canadian harvest fields last August, saying he hoped future migration schemes would indicate more forethought than this one, whose workings he had personally seen in Canada.

"You didn't say that when you were over there," a Conservative member remarked.

New Diphtheria Vaccine a Success

French Scientist Says Disease Will Be Unknown In Few Years

"It is only a question of a few years before the dread diphtheria with all of its attendant diseases, such as croup and various forms of bronchitis, will be entirely unknown in France and, we hope, throughout the rest of Europe." This is the prophecy of Dr. Ramon, of the Pasteur Institute of Paris, who with his colleagues at the special diphtheria section at Garches, on the outskirts of Paris, has decided to spend the coming year in improving the vaccine which has given remarkable results during the past four years.

The experimental laboratories at Garches have been something like a revelation to the several hundred of European and American scientists who have visited and signed its registers during 1928. The first impression of the premises is of a royal stud farm "gone to seed." For Garches was primarily designed as an experimental hospital for horses and cattle, and it was while treating these animals that Dr. Ramon discovered his vaccine for diphtheria among humans.

At first the results were not satisfactory, and Dr. Ramon found difficulty in convincing his colleagues that success was not to be had in a single year. The military hospitals were used to provide patients for the vaccine, and month by month the vaccine was made purer and stronger, the results became little short of remarkable. A winter attack of diphtheria was formerly sufficient to throw half of an infantry company into the isolation wards. After a few days treatment with the Ramon vaccine, it was found that the isolation bars could be lifted without danger to others in the hospitals.

Similar results were obtained in the schools and Dr. Ramon believes that this year's records will show complete immunization among school children, after their initial vaccination, of nearly 100 per cent. If this can be obtained, efforts will be made to make the use of the vaccine compulsory throughout France. So great is the confidence of foreign scientists in the effort, thousands upon thousands of bottles, prepared for urgent cases of diphtheric maladies, are now being shipped to other countries every month, and so far there has been no complaint.

Eggs From Mature Hens Hatch Best

Shown To Give Better Hatching Results Than Eggs Laid By Pullets

Eggs from mature stock gave better hatching results at the Lennoxville, Quebec, Experimental Station, than those laid by pullets. In the report of the station for last year, published by the Department of Agriculture, at Ottawa, it is shown that hatchlings from the hens showed an average fertility of 90.28 per cent, as compared with 76.26 per cent. fertility from the pullets' eggs. Of the total eggs set those from mature stock yielded 53.89 per cent. of chickens as compared with 41.96 per cent. from the pullets' eggs. The return from those laid by the hens was also slightly higher than those laid by the pullets. There was practically no loss of chickens among those hatched from the hens' eggs.

Liz—My ole man only pinched ten quid, an' 'e got six months. But your Bill stole twenty quid, yet 'e only got three months. 'Ow d'you explain that eh? Gert—I s'pose they makes a reduction for quantity, ole dear.

Jean: "When Ted proposed he acted like a fish out of water."
Peggy: "Why shouldn't he? He knew he was caught."

Very often the person who boasts of having no religious prejudice has no religion either.

"When did you get your driving licence?"
"I hope to get it next month!" — Pete Mele, Paris.

N. W. U. 1759

SENATOR SMEATON WHITE
President, Morning Gazette Publishing Co.

Hon. Smeaton White, Senator, President of the Montreal Gazette Printing Company, Limited, was born in Hamilton, Ontario, in 1865, the son of Richard White. He was educated in Montreal High School and at Bishop's College School, Lennoxville, and in 1885 joined the staff of the Montreal Gazette, leaving the Canadian Paper Company. In 1892 he was made Business Manager of the Gazette. In 1900 he became Managing Director, and in 1910, President. He was appointed to the Canadian Senate in 1917.

Manitoba In Lead

Heads Provinces For Influx Of Population In Past Six Months

Manitoba received the largest influx of population during the past six months according to a return issued by the department of immigration when of the 123,713 persons who came to this country, 49,975 proceeded to the middle west provinces.

All the provinces, however, had an access of strength, the number varying from the figure given for Manitoba to a total of 89 people, who went to Prince Edward Island, Ontario came in for the second largest share, no fewer than 30,677 going to this province, while Alberta received 11,961. The figures for the others were:

Quebec, 11,784; Saskatchewan, 10,965; British Columbia, 5,609; New Brunswick, 1,482; and Nova Scotia, 1,142.

Twenty-one persons went to the Yukon, one to the North-West Territories and four gave no destination. Of British settlers there were 44,876, distributed among the four countries of the United Kingdom, as follows: England, 22,882; Scotland, 12,104; Ireland, 7,200; Wales, 2,690. Germany furnished 9202 settlers; Denmark, 2,482. From the United States came 18,707 persons.

Fertilizing For Potato Land

Experiment With Stable Manure and Commercial Fertilizer

For five years in succession experimental work was carried on at the Charlottetown Experimental Station to find out whether or not it is more profitable to use stable manure alone or stable manure and commercial fertilizer for the growing of potatoes. A four-year rotation of potatoes, grain, clover and timothy, was used. The first plot received stable manure at the rate of 20 tons per acre; plot two received a complete fertilizer at a rate equivalent to 1,000 pounds per acre; and a third plot received stable manure at the rate of 10 tons per acre, and 500 pounds of a complete fertilizer. These plots were compared with check plots receiving no fertilizer.

In the report of the superintendent for the station, for 1927, published by the Department of Agriculture, at Ottawa, the average yields covering the five-year period are given.

The yield from the plots receiving the stable manure alone, was 11,983 pounds, with 81.3 per cent. marketable. The complete fertilizer alone gave an average yield of 9,396 pounds of potatoes, 75.3 per cent. marketable. The returns from the land receiving half fertilizer and half manure were practically equal to the plots receiving stable manure alone, amounting to 11,582 pounds of potatoes, with 84.8 per cent. marketable. The land that received no fertilizer yielded an exceedingly poor crop of 3,787 pounds, with 67.3 per cent. marketable.

Lenient Leonard—No man with any sense would allow you to carry on the way you do.

His Fiancee—How do you know what a man with any sense, would do?

Her Mother: "Young man, if you should marry my daughter it would kill me."

Johnny: "Is that a promise?"

From Producer To Consumer

Census Report Portrays Mechanism Of Distribution In Canada

A report has just been issued by the Dominion Bureau of Statistics giving in detail the results of a postal census of Trading Establishments taken in 1924, the main figures of which were issued by the Bureau some time ago. The object of the census was to obtain a measurement of the mechanism of distribution in Canada. Statistics have long been available relating to population and, more recently, regarding the production of commodities. The mechanism, however, by which commodities have been distributed to the ultimate consumer, has in the past been subjected to but slight quantitative measurement. Information regarding this mechanism is of great economic and social importance and the present report represents a first step to meet an urgent need.

To bridge the gap between producers and consumers, or, in other words, to perform those services which finally place products of all kinds in the ultimate consumer's hands, requires a large amount of capital. The report shows, for some 67,000 establishments which reported, a capital investment of more than a billion and a half dollars. Sales amounted to \$1,600,000,000. Forty per cent. of independent retail stores in cities of 50,000 population or over had sales of less than \$10,000, and twenty-three per cent. had sales of less than \$5,000. A grouping of stores according to size of capital investment shows that 70 per cent. of the retail establishments reporting, operated on an investment of under \$10,000, while the same percentage of wholesale-retail stores extended into the \$50,000 class, and 70 per cent. of wholesale stores reached into the \$50,000 group. Apart from general and departmental stores, grocery establishments had the largest amount of capital invested. In retail establishments working capital was roughly twice fixed capital, in wholesale-retail establishments it was roughly 2½ times, but in wholesale establishments working capital was nearly 4 times as great as fixed capital. Many other interesting facts about trading establishments are shown in the report.

Canadian Flour In India

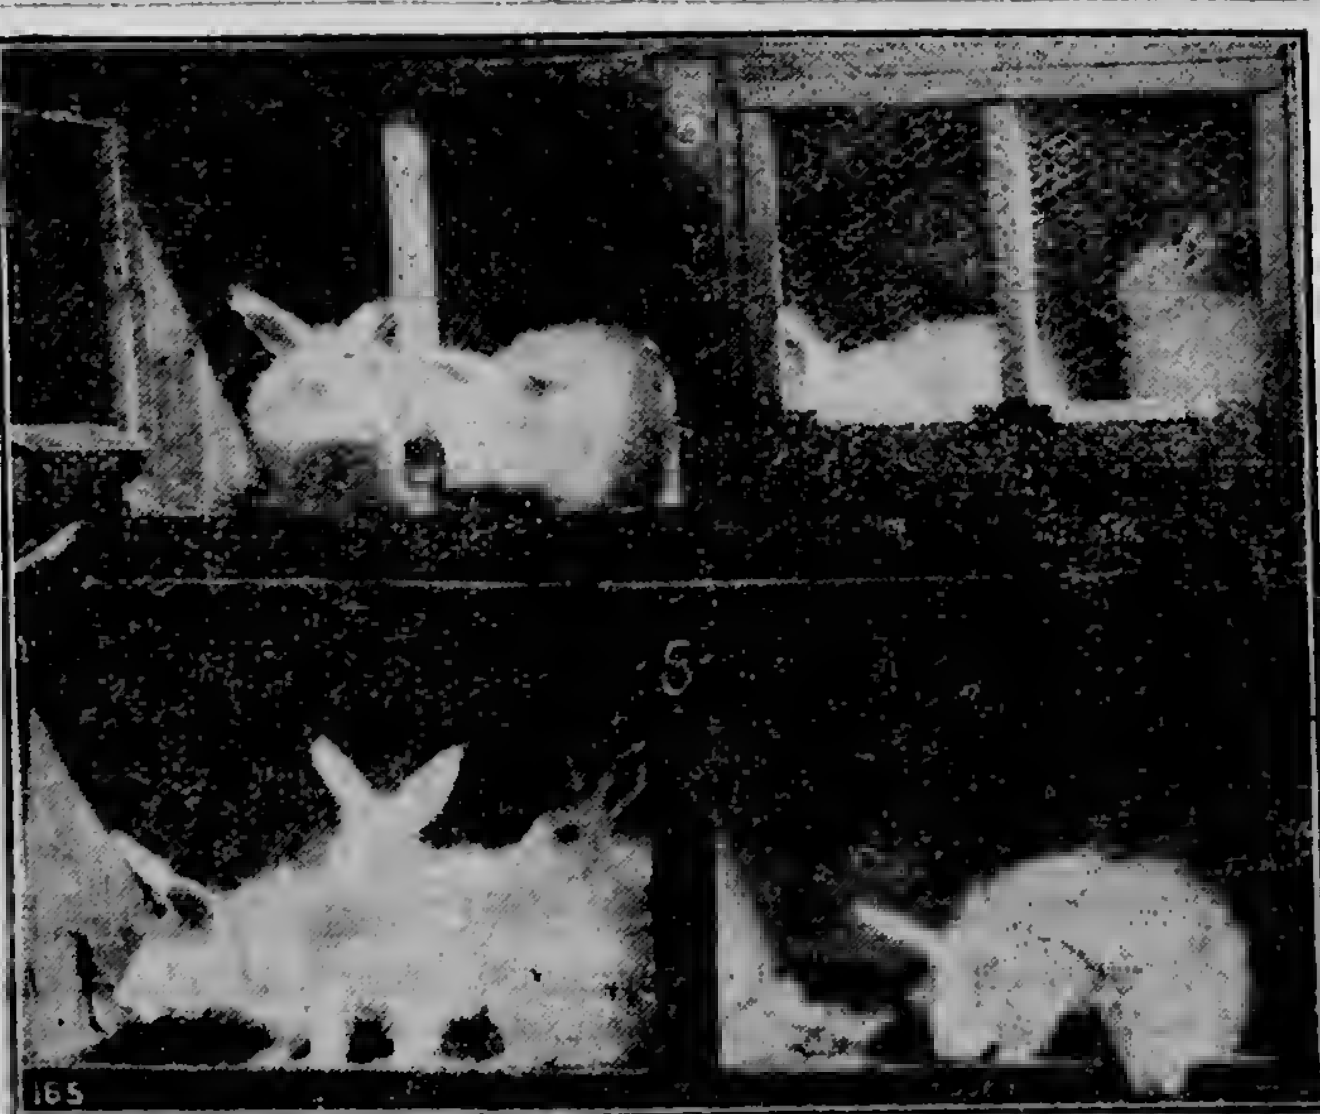

Calcutta Biscuit Manufacturer Finds Canadian Flour Is Needed

Experiments carried out by a Calcutta biscuit manufacturer with some samples of Canadian flour shipped to Calcutta by a Canadian milling firm have been highly satisfactory, writes Mr. H. R. Poussette, Canadian Trade Commissioner in Calcutta, in the Commercial Intelligence Journal. Indian bakers have been experiencing heavy losses due to the high percentage of breakage in biscuits made entirely of Indian flour. In one case, by mixing Canadian and Indian flours breakage was reduced from 45.5 to 7.00 per cent. It is quite possible, as a result of such experiments, that in time, there will be a small but steady demand for Canadian flour in India.

Milk For Dairy Factories

The approximate amount of milk required to supply dairy factories in Canada during 1926, based on the quantity of milk delivered and the equivalent in milk of the butter fat content of the cream delivered, was 7,118,940,782 pounds.

Passer-by (to "blind" beggar)—"It seems to me that you can see."
Beggar—"Oh, well, in these days competition is so great that even a blind man must keep his eyes open."

New Zealand goes in for Rabbits

One hundred of these chinchilla rabbits made a twelve thousand mile journey under the auspices of the Canadian Pacific Express Company from Lincolnshire, England, to Auckland, New Zealand, where they will form the nucleus of a rabbit farm. The express messengers disbursed one ton of feed to them during the voyage.

NEW POSTAGE STAMP

Here is shown a picture of the new Canadian postage stamp to be issued by the Dominion. The word "Post" is printed in two languages, and the picture of the king is retained.

Aerial Photography In Winter Possible

New Process Is Expected To Revolutionize Timber Survey

A new process in aerial photography which will revolutionize winter timber cruising, has been developed by International Airways of Canada, according to H. L. Sellar, director of the photographic section at Ottawa. Mr. Sellar declared the new scheme would enable work to be done in a few days which would normally take months. It would entail the employment of ground parties in considerable numbers.

The process, he said, made use of photography to show up varieties of standing timber even when naked of foliage. The approximate number of trees to a standard area of the photograph taken at a certain altitude would be used to calculate the number of trees of each variety in the whole area under survey, he declared.

The system is primarily a scheme to make aerial photography useful in winter.

Bachelor's Quarters At Marlborough House

Would Seem To Indicate Royal Romance Not On Cards

British subjects who would like to see the Prince of Wales married have received another setback.

A rumor of several seasons' vintage had it that when the Prince moved into Marlborough House he would prepare to settle down to a domestic existence. But shortly after the Prince started on his African tour with the Duke of Gloucester, his plans for the new home became known.

The Prince has ordered built within the walls of Marlborough House an apartment to suit the needs of a bachelor.

Two bedrooms and a sitting room, kitchen, bath and a very complete library are not the sort of arrangements Britain might expect for a Prince with a bride. The Prince will occupy the apartment, it is said, in preference to the more cold and stately rooms of the famous old house.

The "we-want-Wales-wed" contingent is gloomy.

Wife—But, my dear, no woman wants to look as though she came out of the Ark.

Hubby—Huh! You women aren't so averse to looking as though you came out of the Garden of Eden, I notice.

Mistress—"You must exercise a little will power with him, nurse."
Nurse—"I do try to, mum, but you don't know his won't power."

If poets are born, a lot of them are unmade in after years.

High Quality Of Crop

Milling and Baking Quality Of This Year's Crop Is Rated High

The milling and baking quality, grade for grade, of the 1928-29 wheat crop, on the whole, is distinctly superior to that of last year, according to a report of the Dominion Grain Research Laboratory of the Board of Grain Commissioners. The report (prepared by F. J. Birchard and T. R. Aitkin, chemists for the Board), points out especially that the moisture content of all grades is low in strength as contrasted with last year; and to date very little tough grain—about one per cent.—and no damp grain have appeared on the market. The weight per bushel of each grade is greater than that of last year; particularly the lower grades; protein content of the wheat is higher in each grade; the quality of the protein, particularly in the lower grades, is superior to that of last year, and the baking quality of the flour from each grade is decidedly superior to that of last year.

Pleased With Canada

British Visitor Sees Opportunities Here For Young Men

"Give me youth again and I should not hesitate to come to Canada," said John Garton, prospective president of Britain's largest organized group of farmers—the National Farmers' Union of England—who has been touring the country, especially Western Canada, on a special mission for the British Ministry of Agriculture. "There are greater opportunities here for the young man with a little knowledge of farming than almost any other country in the world." In company with Arthur Amos, director of the University Farm at Cambridge, England, Mr. Garton has been investigating farm organization and labor-saving devices in Canada, with a view to reporting on what might be profitably applied to British farming.

Alberta Fur Production

Province Occupies Fourth Place In Canada In Production Of Furs

According to an announcement of the Provincial Game Guardian a total production of \$2,256,353 is reported for the Province of Alberta for the year ending June 30th, 1927. This is a slight advance over the figures of the previous season, and brings this province into fourth place for fur production, the Northwest Territories exceeding the output by \$700,000. The total production for Canada is reported as \$18,833,977, as compared with \$15,072,244 during the preceding year.

Enjoying Sound Prosperity

Canada Would Now Seem To Be The Favored Country

"With agriculture prosperous, manufacturing plants active, building construction achieving new records in all parts of the country, and mines producing increasing quantities of ore, it is not surprising that the employment index for each month in 1928 should be well above the level of the corresponding month of any previous year. Import and export statistics reveal a large volume of trade and all indices of Canadian business conditions show that the country is enjoying a sound prosperity."—Royal Bank of Canada Bulletin.

New Seed Cleaning Plant

Warehouse and Seed Cleaning Plant For Saskatoon

The Saskatchewan Registered Seed Growers Limited has arrangements under way for the establishment of a warehouse and cleaning plant at Saskatoon, it is announced by F. W. Townley-Smith, of Lashburn, one of the directors of the organization. The rapid increase in the business in seed grain is necessitating this move, Mr. Townley-Smith remarked. At present the seed cleaning plant at Moose Jaw is the only one in the province.

"Your education is costing me a great deal," said the father to his son.

"I know, father," the boy replied. "And I don't study very hard, either."

Young man, is your chief at liberty?

Always for beautiful young ladies, madam.

Then tell him his wife wishes to speak to him.

"Donal"—"We'll chust toss for wha's gaen the pey for the drinks. If it's heeds you pey, Pat, and if it's tails Dugal peys, and if it stands on and I'll pey."

Nurse: "He seems to be wandering in his mind." Patient's Wife: "Oh, well, he can't stray far!"

Wrangel Island Colony Starving

Steamer With Relief Supplies and Also Airplane Fall To Reach It

How to get food to five Russians and 55 Eskimos who have been cut off from the world on Wrangel Island since 1920, is causing much worry at Laurence Bay, Siberia.

The steamer Stavropol, assigned to carry the colony a three-year supply of food, fuel and medicine, failed to break through the ice and recently returned.

Orders have come from Premier Rykoff that other measures must be taken to reach the island, since help next summer might be too late. An aeroplane that set out on the same mission as the ship was also compelled to return.

Wrangel Island has a record of tragedy which well may frighten members of the Russian expedition residing there now. If, indeed, disaster has not already overtaken some, or all, of them.

In 1921 an expedition was fitted out at Nome, Alaska, under the supervision of Vilhjalmur Stefansson, the explorer, to take possession of the island in the name of Canada. Stefansson did not go himself, but put the expedition in the charge of a young Canadian, Allan Crawford, of Toronto.

The expedition landed on the island in 1922. Nothing more was heard from it until late in 1923, when a relief expedition found only Ada Blackjack, an Eskimo seamstress, alive.

One member of the expedition, Lorne Knight, had died of scurvy during the winter preceding, it was found, while three others, Allan Crawford, Frederick Maurer, and Milton Galle had set out to reach Siberia over the ice, they have never been heard from since.

Entries in the diaries of those on the island indicate an extreme shortage of food. Milton Galle writes in his record in August 1922, five months before he set out with his two companions for Siberia: "Crawford and I have been dipping hard bread in grease all day long and seem never to get filled."

Considerable controversy followed the revelation of the tragedy, in which the charge was heard from several sources that Stefansson had been derelict in the fulfillment of his promises to those composing the expedition to Wrangel Island. It was said, that when the party left, the explorer had promised to come out the following summer with supplies for them.

Other evidence, however, pointed to the men's intention to live off what game they might kill, a possibility Stefansson had already proven practicable in his long experience in the Northland. Culpability in the matter was the subject of considerable newspaper controversy for more than two years following the discovery of the tragedy late in 1923.

Wrangel Island is listed in the Encyclopedia Britannica as belonging to Russia, although claims of a sort by both Britain and the United States might be supported by one circumstance or another.

Forty More School Districts
Forty new school districts have been established in Alberta in the first nine months of 1928 making a grand total of about 3,500 in the Province including city, town and rural schools. School expansion is particularly in evidence in Northern Alberta.

Friend (visiting hospital patient)—Do you know, old man, that's a swell looking nurse you've got?

Patient—I hadn't noticed.

Friend—Good Lord! I had no idea you were so sick.

House Hunter—What's this room, with no ceiling and open to the sky?

Agent—It's the shower-bath-room. The house was built by a Scotchman.

Radium is worth \$1,750,000 an ounce.

"It must have been a terribly hard job to teach that animal to sit up and beg!"—Nagel's Lustige Welt, Berlin.

**R. A. A. A.**  
**To Organize**

The annual meeting of the Raymond Amateur Athletic Association will be held in the Town Hall, Wednesday, November 28 at 8 p. m. Officers will be elected for the coming year, and business in connection with all winter sports will be discussed. A large attendance of sport enthusiasts is urged. All paid up members of the association are allowed to vote on the election of officers, and everyone is invited to be present.

The organization of the Southern Alberta District Basketball League will be effected at the annual meeting to be held at the L. Y. P. C. A. hall, Lethbridge, on Saturday, December 1 at 11.15 a. m. A full representation from all local clubs will undoubtedly be present, together with district organizer, Chas. Asplund, of the School of Agriculture staff. One of the important questions to be discussed at this meeting will be the changes made this year in the constitution of the Alberta Amateur Basketball Association. Vice president Golden Woolf will explain these new rulings thoroughly.

Mr. Lowell Duncomb, sugar factory engineer, motored to Taber last Friday to be present on the sad occasion of the funeral services for his mother, Mrs. Walter Duncomb. Mrs. Duncomb is an early pioneer of Southern Alberta, and was a resident of Raymond for several years in the early days. She succumbed to an attack of heart failure following a brief illness.

Mr. and Mrs. Melvin King and Mr. and Mrs. Rulon Dahl motored to Calgary last week to attend the silver fox show. They report a wonderful exhibition of foxes.

**Westinghouse**

*The Greatest Radio Value Ever Offered*

**6Tube CONSOLE**  
**for Only \$167<sup>00</sup>** Uses UX-201-B Radiotrons

When you buy a Westinghouse Battery Console Radio you own a beautiful instrument that embodies the latest improvements at a price that represents more radio value than has ever been offered before.

It gives you:  
Full 6-tube power, using the new Westinghouse UX-201-B and UX-121-B Westinghouse Radiotrons.

Selectivity, finely balanced, giving equal performance in the upper and lower wave bands.

True-to-life tone quality—both high and low notes reproduced with equal fidelity.

Economy of operation. The new UX-201-B Radiotron uses only half as

much filament current as the former standard UX-201-A, thereby reducing the cost and frequency of "A" battery recharging.

Distant stations brought in with ease and clarity.

New improved cone speaker, developed by Westinghouse, and many other features which we will be glad to show.

Single dial control.
